

July 8, 2019

Crestone Peak Resources will be re-entering locations in Firestone this month to conduct maintenance on existing oil and natural gas wells.

The locations that the maintenance activity will take place at include:

- Miller 33-17 J, 23-17, 24-17
 - Location is north of County Road 20 just east of County Road 15.

This activity will include the use of a truck mounted service rig, temporary water tanks, and worker pickup trucks. All access to this location is limited to the access road and all work will be done during the day.

This activity should take about five days to complete.

Please contact Crestone at 720-410-8537, at CommunityRelations@CrestonePR.com or visit <http://www.crestonepeakresources.com/>.
