

Dear Residents,

We are writing to inform you that Occidental will begin developing new oil and natural gas wells in and around your community. Please see the map on the reverse side of this letter for the planned location of the wells. Our goal is to provide you with timely information about our operations and be available to discuss the plan with you.

Enclosed you will also find a flier with a description of the phases of new well development. You will begin to see our team members on site in the coming week as they prepare the locations (Phase 1) for horizontal drilling. Next, a drilling rig will begin the underground well construction process by installing steel pipe and cement (surface casing) to protect groundwater (Phase 2). Horizontal drilling (Phase 3) is expected to begin in late Spring or early Summer and is likely to extend through mid-Summer 2020. Our dates are approximate and may be subject to change. We will send additional information as plans to conduct hydraulic fracturing, facility construction and reclamation (Phases 4-6) progress.

We strive to make our activities as compatible as we can with the surrounding community and use a variety of mitigation techniques to reduce the temporary impacts to the community. Occidental is committed to safeguarding the environment and protecting the safety and health of our employees and neighboring communities.

If at any time you would like additional information or wish to report an issue related to our operations, you may reach us through the Occidental Colorado Response Line. We welcome your feedback at any time as we perform work near your community.

Sincerely,  
Stakeholder Relations Team
